HSS Journal, the Musculoskeletal Journal of Hospital for Special Surgery, is devoting an upcoming issue to articles highlighting rehabilitative methods for investigating the origin, diagnosis, treatment, and prevention of conditions in orthopaedics, rheumatology, and sports medicine.

The Journal invites you to submit applied or translational research, review articles, or case studies in the following areas:

- Rehabilitation interventions or protocols involving the upper or lower extremities
- Assessment of neuro-muscular and musculoskeletal diagnoses
- Motion analysis of upper or lower extremities
- Interdisciplinary collaboration with other services to optimize patient care
- Case studies presenting either an unusual diagnosis or an exceptional treatment

HSS Journal publishes articles that contribute to the advancement of the knowledge of musculoskeletal diseases and encourages submission of manuscripts from all musculoskeletal disciplines.
