

Amounts Generally Billed (“AGB”)

HSS utilizes the “look-back” method to calculate the Amount Generally Billed (“AGB”). Specific percentages are calculated by applying the average Medicaid collection ratio to the amount charged. It is calculated annually by dividing 12 months of allowed Medicaid claims by the gross charges associated with those claims. The specific AGB percentages are as follows:

Provider Type	Category	% of Charges
Hospital	Inpatient Services Non –Surgical Outpatient (Radiology, Lab, etc.)	30% of Hospital Charges
Hospital	Ambulatory Surgery Minor Procedures	17% of Hospital Charges
Applicable Schedule A Physicians	All except Radiologist. Includes Surgeon, Rheumatology, Pathology, etc.	6% of Physician Charges
Applicable Schedule A Physicians	Radiologist	10% of Physician Charges
