24 Welcome Class of 2018 Alumni!

On the cover: Images from past Annual Alumni meetings
I am honored to be the current Alumni Association President and grateful for the training that I received at HSS. I have been in practice at Hospital for Special Surgery (HSS) for 26 years as a member of the Sports Medicine and Shoulder Service. The institution and its faculty continue to grow and flourish in the critical areas of research, education, and innovation. As professionals, it’s important to not become complacent with our knowledge base or surgical techniques. We need to continue to learn, grow, and evolve our skills to remain successful as orthopaedic surgeons. HSS continues to cultivate an environment supportive of professional growth through our Alumni Association.

Join us for the Milestone 100TH Annual Alumni Meeting!

I would like to personally invite you to the 100th Annual HSS Alumni Association Meeting, which will be held on October 25-27, 2018. These three days will offer engaging debates and interactive sessions in all subspecialties. While we’re maintaining our time-honored sessions, we’re introducing new program features, case presentations, and opportunities for discussion in response to your feedback. The meeting remains a wonderful opportunity to reconnect with your classmates and meet new alumni. I hope that you will join us to celebrate the 100th anniversary of the Annual Alumni Association Meeting.

Connect with Colleagues

There are a myriad of opportunities to catch up with your colleagues both professionally and personally at the Alumni Association meeting. This year, we’ve added another chance to do so – a wine and cheese reception on Friday evening, October 26. Meet with friends and colleagues at the reception, and take the opportunity to continue the festivities over dinner at any of New York City’s restaurants.

HONORING DR. DAVID B. LEVINE

During the meeting, we will unveil the portrait of David B. Levine, MD, Chief Emeritus of the Scoliosis Service and former Director of the HSS Alumni Association and the HSS Archive. For nearly 30 years, Dr. Levine was a member of the orthopaedic attending staff at HSS, and during that time served as Chief of the Scoliosis Service and Director of the Department of Orthopedic Surgery. Dr. Levine influenced hundreds of alumni trainees and we are all grateful for the years that he gave to HSS. Please join us for this special tribute on Thursday, October 25.
As alumni, we are appreciative for what Hospital for Special Surgery (HSS) has provided us during different stages of our training and career. We have all contributed to and benefited from what HSS represents: high-quality patient care, groundbreaking research, and the education of future thought leaders in musculoskeletal health. What bonds us all, and makes HSS special to each of us, is the unique people who have made this institution what it is, what it stands for, and who continue to make it what it is today.

Who are the role models of HSS? Who are those we hold close during our daily practice, and aspire to emulate? For me, it’s Dr. Leon Root, and his clinical and personal characteristics. Anyone who had the opportunity to meet him remembers his unmistakable warmth, his sincere smile, his deep and commanding voice, his handshake that seemingly enveloped your hand but did not injure it, and his humane and humble interaction with patients.

I had the opportunity to learn from Dr. Root while I was a resident on my orthopaedic pediatric rotations. The power of Dr. Root’s compassion moved me. He combined world-class orthopaedic care with an emotional sensitivity, balancing the complexity of musculoskeletal care, social support, hope, and a connectedness for everyone involved in the care of a patient.

Dr. Root taught the history of procedures and the narrative of those who created them, bringing to life the orthopaedic world for each resident. His influence in my career continues, and I return to his core values and am appreciative of what we do each day in medicine.

His legacy lives on in the decades of individuals he has inspired. Dr. Root is the personal foundation behind the accolades of HSS, and why I am so proud to be an alumnus of this institution.

Sam, Jose, and I hope that you will be inspired to join us this fall to reconnect, learn, and celebrate the special occasion of the centennial meeting of our association.

See you in October,
Peter K. Sculco, MD
The HSS Alumni Association has big plans as we kick off our second century. This year’s streamlined Alumni Association 100th Annual Meeting packs in new features while returning to some time-tested themes.

The program starts at 3 pm, on Thursday, October 25, with the 11th Annual HSS Faculty Development Seminar, featuring invited speaker Honorable George Grasso. As always, the first hour is dedicated to our current trainees and the second hour will focus on engaging all alumni in leadership discussions. Titled “Leadership Under Crisis—The Role of Planning and Reacting”, the first hour of the seminar will focus on simulation and evaluation in surgical training and the second hour on the role of planning for crisis situations.

At the close of Thursday’s sessions, join colleagues to honor Dr. David B. Levine, Chief Emeritus of the Scoliosis Service and past Director of the HSS Alumni Association and the HSS Archive, at 5 pm, in the Richard L. Menschel Education Center. A portrait of Dr. Levine will be unveiled and dedicated at this time.

Continue your Thursday social hour with the welcome cocktail reception beginning at 6 pm at the Weiss Café of Rockefeller University, an easy walk from HSS.

Another new opportunity to connect with colleagues takes place on Friday—a wine and cheese reception immediately following the program. Meet up with friends here, and make plans to enjoy New York City’s renowned restaurants for dinner.

In response to your feedback, the program planning committee has organized this special Alumni Association 100th Annual Meeting with:

- More debate sessions
- More subspecialty interactive sessions
- More case presentations and discussions

Mark your calendar for these NEW Program Features:

- Alumni Lessons Learned Case Presentation and Award
- Cases That Changed How I Practice Presentation

Additional program highlights include the Presidential Address from Alumni Association 2018 President Jo A. Hannafin, MD, PhD, and reunion presentations from the classes of 1988, 1998, and 2008. In special acknowledgment of our centennial year, there also will be presentations by noted medical historian David J. Rothman, PhD, a professor at Columbia University College of Physicians and Surgeons, and by David B. Levine, MD, and G. Dean MacEwen, MD, who will discuss the Alumni Association’s history.

Registration is open!
For the full agenda, go to hss.edu/cme
“We’ve really taken to heart how we can streamline the meeting to make sure as many HSS alumni can be there as possible. We’ve tried to restructure the days that the meeting will occur, and the format of the meeting, so as to make it accessible for both HSS faculty and external alumni, and also ensure that the curriculum is passionate and exciting in order to stir debate, and to re-energize our Alumni Association.

I think there’s a lot of energy and excitement around this being the 100th Annual Meeting. So the planning committee and other faculty have been very interested in re-evaluating the way the meeting has functioned in the past, and really bringing it into a very exciting new beginning for education, camaraderie and fellowship amongst all of our alumni.”

—Daryl C. Osbahr, MD
Resident Class of 2010
Member, Alumni Meeting Planning Committee

“I look forward to coming back to the Alumni meeting as a way to catch up with my colleagues both professionally and personally. I still remember walking into HSS every morning, over twenty years ago now, feeling so lucky to be amongst such a bastion of intellect, surgical skill, and professionalism. I still feel the same today, if not more so. I will always be grateful to be given the opportunity to train at such a remarkable institution with wonderful people.”

—Kevin F. Bonner, MD
Reunion Class of 1998

100TH Annual Alumni Meeting
Friday Class Meet-Ups

Why not make plans now to get together with your class year after Friday’s wine and cheese reception? Invite surrounding class years too!

Oxford, UK
Oheneba Boachie-Adjei, MD, recalls that as a young general surgery resident, he was “impressed with the reconstructive orthopaedic procedures that returned mangled and disabled persons back to function.”

But instead of immediately pursuing specialized training in orthopaedic surgery, he came to HSS for a fellowship in pathology under Peter Bullough, MD. It was a decision that set the course for the rest of his career. “I spent a whole year working on spinal diseases,” he says, dissecting more than 100 human spines. During that time he and Dr. Bullough also collaborated to produce a classic text, *The Atlas of Spinal Diseases* (Gower Medical Publishing, Ltd., New York, 1988).

Today Dr. Boachie-Adjei is world renowned as a complex spine surgeon, chief of the HSS scoliosis service from 1994 to 2014, and founder of the FOCOS Hospital, the pioneering orthopaedic hospital in Ghana, West Africa. In recognition of his leadership, his wide-ranging achievements and his active participation in alumni affairs, HSS will present the Distinguished Alumnus Award to Dr. Boachie-Adjei at the 100th Annual Alumni Meeting in October.

Dr. Boachie-Adjei had come to New York from his home in Kumasi, Ghana, in 1972 to attend Brooklyn College, from which he graduated summa cum laude. He went on to earn his MD at Columbia University College of Physicians and Surgeons and complete a general surgery residency at now-closed St. Vincent’s Hospital. After his pathology fellowship at HSS, he stayed for a residency and clinical fellowship in spine (1986).

He went next to the University of Minnesota for further training in scoliosis, and stayed on as faculty until 1990. Then he joined the Southern California Complex Spine and Scoliosis Center as associate medical director. And in 1994 Dr. Boachie returned to HSS as chief of the scoliosis service and professor of orthopaedic surgery at Weill Cornell Medicine.

Over the next two decades, under Dr. Boachi-Adjei’s leadership, the HSS scoliosis service both grew and maintained its reputation as one of the best such centers in the country. In addition to Dr. Bullough, Dr. Boachie-Adjei credits two other mentors for his success: Philip D. Wilson, Jr., MD, who recruited him back to HSS, and David B. Levine, MD, the former scoliosis chief. “Dr. Levine stayed with me a couple of years before he retired, and I continually stayed in touch with him,” says Dr. Boachie-Adjei.

Throughout his education and early career, Dr. Boachie-Adjei held the dream of returning to Ghana to provide accessible and state-of-the-art care for all orthopaedic issues, but in particular for the crippling spine deformities that often go untreated in African children with scoliosis.

In 1998 he established the Foundation of Orthopaedics and Complex Spine (FOCOS) to provide affordable orthopaedic care in developing countries. That year he led his first humanitarian mission to Ghana, and over the next 10 years nearly 500 volunteers visited, with surgical teams arriving every four to six months.

Building on the success of the volunteer missions, Dr. Boachie-Adjei opened the FOCOS Orthopaedic Hospital in 2012, in Accra, Ghana’s capital. Patients come from across sub-Saharan Africa to the 50-bed facility. By training local surgeons, nurses and other staff, Dr. Boachie-Adjei has made the hospital increasingly independent and sustainable.

Dr. Boachie-Adjei’s achievements have been recognized with many honors, including the American Academy of Orthopaedic Surgeons’ Humanitarian Award in 2004 and the Hospital for Special Surgery Lifetime Achievement Award. (continued on page 22)
Regional Anesthesia World Conference
A reception was held on April 19, 2018 for HSS staff and alumni during the Regional Anesthesia World Congress Meeting in New York. There were over 50 past fellows and alumni in attendance. Richard Brull, MD (2005 Fellow), Carrie Guheen, MD (2012 Fellow), Stephen C. Haskins, MD (2013 Fellow), and Danielle Ludwin, MD (2007 Fellow) all presented at the Regional Anesthesia World Congress Meeting in New York in April 2018.

Announcements
Ellen M. Soffin, MD, PhD (2015) was chosen as Teacher of the Year by the 2017–2018 HSS Regional Anesthesiology and Acute Pain Medicine Fellows. Dr. Soffin was also chosen as HSS Teacher of the Year by the 2018 Graduating Anesthesiology Residents from NYP-Cornell.

David H. Kim, MD, Principal Investigator (2009 Fellow) and Co-Investigators, Yi Lin, MD (2007 Fellow), Jonathan C. Beathe, MD (2008 Fellow), Enrique A. Goytizolo, MD (1997–1998 Fellow and now HSS Attending), Joseph A. Oxendine, MD (2003–2004 Fellow and now HSS Attending), Jacques T. Ya Deau, MD, PhD, Daniel B. Maalouf, MD, PhD, (2004–2005 Fellow and now HSS Attending), Amar S. Ranawat, MD, Edwin P. Su, MD, David J. Mayman, MD, Michael M. Alexiades, MD, Stavros G. Memtsoudis, MD, PhD, and Christopher Garnett, MD, received a “Best of Meeting” Abstract award at the World Congress on Regional Anesthesia and Pain Medicine New York in April. The title of the abstract was “The Addition of ACB and IPACK to PAI Enhances Postoperative Pain Control in TKA: A Randomized Controlled Trial”.

Kathy Chuy, MD; Stephen C. Haskins, MD; and Guilherme Holck, MD (all are 2013 HSS Fellows; Dr. Haskins is an HSS Attending)

Upcoming
ACR/ARHP Annual Meeting
The HSS Department of Rheumatology will hold its annual reception at the American College of Rheumatology and the Association of Rheumatology Health Professionals Annual Meeting in Chicago on Monday, October 22, 2018. The reception will take place at the Hyatt Regency McCormick Place from 6:30–8:00 pm.

Join our professional community now at @HSSProfEd and HSS Professional Education.

Engaging leaders. Connecting peers. | 7
HSS Alumni Association at the
2018 AAOS Annual Meeting

In the heart of the New Orleans French Quarter, the historic Hotel Monteleone provided the ideal location for the American Academy of Orthopaedic Surgeons (AAOS) 2018 Alumni Reception. More than 225 alumni gathered there on March 9 to enjoy traditional creole cuisine and spirits. In his new role of Alumni Director, Jose A. Rodriguez, MD, emphasized the significance of the Association and the 100th anniversary of the annual meeting, which energized the crowd. The evening provided an opportunity for the HSS community to spend time in an informal, relaxed setting.
PLEASE JOIN US IN 2019!

March 12–16, 2019

Alumni Cocktail Reception
Friday, March 15, 2019
Sunset Terrace at the Wynn Las Vegas
6:00–8:00 pm
details to come
While Irwin Nydick, MD, HSS Emeritus Attending Physician, has seen great change within HSS over his more than 50 years at the Hospital, he has also witnessed just how much remains the same. Particularly the commitment to exceptional patient care.

In 1956, a chance meeting with HSS chief of cardiology Dr. Henry Kirkland, under whom Dr. Nydick had served as a fellow in cardiology at the Cornell Division of Bellevue Hospital, brought Dr. Nydick into the HSS fold. Coincidentally, Dr. Klaus Mayer, the Hospital’s hematologist and blood bank director, had been urging Dr. Nydick to explore the same possibility. As Dr. Nydick recalls, his role grew over time: “HSS was expanding, and they realized they had to have better cardiac care. Soon I was reading cardiograms every day and became an intimate member of the staff.” He could see there was a unique atmosphere at the Hospital.

During his time at HSS, Dr. Nydick worked alongside many Hospital leaders, including fellow Wilson Society member Dr. David B. Levine, and the namesakes for the Society: Drs. Philip Wilson, Sr. and Jr., Dr. Nydick credits the Wilsons for helping to create the culture of excellence that continues today. “Philip Wilson, Sr. was the driving force to establish the research part of the institution. Philip Wilson, Jr. became a good friend. He was an absolute perfectionist in how he cared for patients, and I used to pride myself in that goal as well. Phil introduced total hip replacement to HSS after having visited and studied with Dr. John Charnley in England. Upon his return, he asked me if I thought the staff and the Hospital would undertake this pioneering procedure. I expressed my confidence in the team, and the rest is history!”

Dr. Nydick is proud to be among those who practiced or studied medicine at HSS and among the over 130 members of the Wilson Society, whose inclusion of HSS in their estates is continuing Dr. Wilson, Sr. and Dr. Wilson, Jr.’s vision of creating better futures for those suffering from musculoskeletal diseases. His membership in the Wilson Society is a way to express his appreciation for his many years at the Hospital: “I named HSS in my estate so the Hospital could continue its wonderful work, and as a small gesture of my gratitude for what they did for me.”

Please visit hss.edu/legacy or contact the Development Office at 212.774.7527 or DelsonS@hss.edu for more information on the Wilson Society.

“Each day, when I arrived in the morning, HSS gave me the feeling that good things were going to happen at the highest professional level. HSS was an extremely friendly, family-oriented place.”

“Under the standards the Wilsons set for the institution, HSS grew into what it is now. It was a massive team effort to achieve success, but the Wilsons were integral to the Hospital’s continued growth.”
My AAOS Experience
Ana Forman, RN, MSN, ONC, FNP-BC

My journey of attending the American Academy of Orthopaedic Surgeons (AAOS) meeting began when I was surprised on my floor by Nursing Administration and the HSS Alumni Association. I had been awarded the Gigi Viellion Orthopaedic Nursing Education Endowed Scholarship. It was an honor because I know that Georgette “Gigi” Viellion dedicated her life to the education and advancement of Orthopaedic Nursing. She exemplified the true meaning of being an HSS nurse with her ambition and dedication to the field.

As soon as I landed in New Orleans and was on my way to the hotel, I saw a huge HSS sign and immediately felt pride. This feeling continued throughout the week. I attended presentations from our very own HSS surgeons and saw numerous poster presentations. I went to sessions focusing on how to conduct research as well as pain management in the orthopaedic population. I was blown away at the HSS section in the exhibit hall. You could spot it from a mile away and HSS was doing something no other booth was. They were capturing videos of the attendees who were sharing their views on research, patient care, education, and innovation. I felt that it was important to share all the different views in this global event. That speaks volumes about HSS regarding how we want to share our knowledge as well as capture others’. I was pleased to record a small segment regarding my view on patient care. I also experienced a NAON presentation. Listening to other orthopaedic nurses disseminate their research was motivating and inspiring.

I am incredibly grateful for this opportunity and would like to thank the HSS Alumni Association for making it all possible. This scholarship really exposes the nursing recipients to the massive contributions our hospital has made in the orthopaedic field. It highlights the surgeons in an academic setting as opposed to the bedside. It was a testament to our HSS surgeons that all their presentations were completely filled. I plan on bringing the new knowledge I obtained from this conference and sharing it with my coworkers. By being given this opportunity, I am able to provide our orthopaedic patients with the best care using the latest information I learned.

Check Your Alumni Dues Status
Please remember Alumni who have not paid their 2018 Alumni Dues will be charged a $75 admission fee per person to attend the upcoming Alumni Meeting reception.

Your annual dues contributions are essential to support the needs and future of the Alumni Association.

Alumni have the option to submit their dues via the online portal at hss.edu/alumni or by check payable to Hospital for Special Surgery. You can also pay in person when checking in at the Alumni Meeting or at the Alumni Reception.

Please contact Colleen O’Shea, MPA, Manager of Alumni Affairs at osheac@hss.edu with any questions.

Join, renew and receive a number of important services and benefits:
- Access to the Alumni Directory
- Opportunity to Refer a Patient
- Access to Online CME Offerings

Alumni receive additional benefits upon paying their dues:
- Access to the Loansome Doc Program
- Subscription to the Alumni News Magazine
- Valuable Discounts on CME Programs
- Subscription to the HSS Journal®
- Semi-annual Updates
- Invitation to Alumni Cocktail Receptions
- Invitation to the CME Accredited Alumni Association Annual Meeting
HSS Alumni Outreach

Alumni Go the Extra Mile to Serve Their Patients and Communities

For Joseph (Josh) Schroeder, MD, Pamela J. Sherman, MD, and Mark F. Sherman, MD, leadership is part of practicing medicine and improving lives

**Bringing Complex Spine Surgery to Ethiopia**

Ayder Comprehensive Specialized Hospital in Mekelle, Ethiopia, a 500-bed facility, serves 8 million people. It has no spine surgeon on staff. But thanks to a mission led by **Josh Schroeder, MD**, (Fellow 2014) the first complex spine surgeries ever to be performed in Ethiopia took place there last March.

The mission was part of a collaboration between Ayder Hospital and Hadassah Medical Organization, in Jerusalem, Israel—Dr. Schroeder’s home institution. Until now, the 5-year-old partnership has largely focused on Israeli medical students doing rotations in Mekelle, and Ayder physicians receiving training and supplies from Hadassah.

“The mission in March was the first for orthopaedic and spine surgery,” says Dr. Schroeder. Over the course of three days, his team of eight doctors, two nurses, and a physical therapist performed five complex spine surgeries. All were on pediatric patients who had life-endangering scoliosis, including a 17-year-old boy with a 110-degree deformity.

“We also trained nurses, physical therapists, anesthetists, and orthopaedic and neurology residents,” says Dr. Schroeder. “And we did training on deformity to the entire local staff.”

**Improving Care for an Underserved Local Population**

As an orthopaedic surgeon at Cook Children’s Hospital in Fort Worth, TX, **Pamela J. Sherman, MD**, (Resident 1997) performs hand surgeries on young people with cerebral palsy (CP). Tightened muscles and tendons cause these patients’ hands to be clenched constantly. When the contractures are released, the children can gain use of the limbs—and for the first time, play with a toy or push a wheelchair control.

But hand surgery is only one of many interventions and kinds of care these patients need. “When they come to our hospital, these patients often have multiple operations and many doctors to see,” says Dr. Sherman. “It can be challenging for them to get access to all the services they need.”

Dr. Sherman has spearheaded several ways of improving care for pediatric CP patients, beginning with helping to create a multi-specialty clinic. Patients can see the various physicians, and also have access to therapy, orthotics, and other necessary services, within the same day of their visit. Dr. Sherman and a colleague also obtained a grant from her hospital’s foundation to implement equipment and personnel to complete upper extremity evaluations.

“We then discovered that the patients were typically unable to have the evaluation performed due to the cost,” says Dr. Sherman. “The testing was not being covered by their insurance.” So she applied for another grant which supports the actual testing of each patient.

CP patients face still more challenges in finding adult physicians to care for them as they age out of the pediatric hospital. To address these needs, Dr. Sherman and colleagues are working to establish a transitioning program similar to others already in place for cardiac and cancer patients.

“We hope to go back next year to continue the work...One of the best benefits of being a doctor is helping out and working for the better good.”

—Josh Schroeder, MD

Fellow 2014

For Joseph (Josh) Schroeder, MD, Pamela J. Sherman, MD, and Mark F. Sherman, MD, leadership is part of practicing medicine and improving lives
“The CP patients are an incredibly rewarding group to care for. Small things provide marked improvement in their independence and function.”

—Pamela J. Sherman, MD
Resident 1997

Fostering Cross-Cultural Friendships with Basketball

Mark F. Sherman, MD, (Fellow 1980) is sports medicine orthopaedics chief at Richmond University Medical Center, on Staten Island, and a self-described “white Jewish kid from Brooklyn.” Jacob Carey, orthopaedic surgical technician at RUMC, and Dr. Sherman’s long-time partner in the OR, is of African- and Native-American descent.

“We were good friends and working partners, and both our kids played basketball,” says Dr. Sherman. They noticed that, on the court, kids of different races and ethnicities played together, but afterward retreated to their own groups. So they brainstormed the Unity Games—an annual weekend of basketball for middle-school-aged boys and girls, combined with an educational platform to foster cross-cultural understanding.
HSS Alumni Outreach (continued)

That was 17 years ago. Ever since, the Unity Games have been held each March in Staten Island. In 2018 they brought together 375 students from all around New York City, New Jersey, and Washington, DC for a two-day program. With assistance from volunteer coaches and mentors, culturally mixed teams are set up, which alternate basketball and classes about dealing with bullying, avoiding drugs, overcoming obstacles, cultural diversity, and health and fitness. Mentors encourage interaction and “getting to know what the other person is really like,” says Dr. Sherman. Local YMCA, Catholic Youth Organization, Jewish Community Centers and others donate venues for the event, and private sponsors cover costs.

“\textquoteleft{}It is an incredible thing, what happens to these kids in two days. We make them feel like it is a family, to be part of this. They make friends with kids they never would have thought they could be friends with. That’s the ultimate goal.\textquoteright{}"

—Mark F. Sherman, MD
Fellow 1980
Peter J. Marchisello, MD
Resident, Class of 1956

Peter J. Marchisello, MD, passed away on March 24, 2018. He started his medical career as a WWII United States Army Surgical Technician, attended Manhattan College, and graduated from New York University Medical School. Dr. Marchisello completed medical and surgical residencies at Harlem Hospital and Hospital for Special Surgery, respectively. His devotion to medicine and desire to help others ultimately led him to practice orthopaedic surgery for over half a century at HSS, St. John’s Catholic Medical Center and NY Cornell Hospital. In addition, he was Medical Officer for the NYC Fire Department from 1991–1994 and Consultant to the Bureau for Handicapped Children from 1970–1982. His notable accomplishments include his appointment as HSS Chief of the Lower Back Clinic and Chief of Orthopaedics at St. John’s. Dr. Marchisello was a true Renaissance man, with a love of philosophy, computers, bridge, languages, and music.

Dr. Marchisello was predeceased by his wife, Winnie, and son, Christopher and is survived by his children, Mary Jo Termini, Peter Marchisello, Marianne Paruch, Geralyn Marchisello, Winnie Pritchett, and John Marchisello, and his eight grandchildren and one great-grandson. His love of life and learning were gifts to all who knew him. Contributions in his honor may be directed to iPads For Soldiers.

Jeffrey L. Hanway, MD
Resident, Class of 1993

Jeffrey L. Hanway, MD, passed away suddenly on March 9, 2018. Dr. Hanway completed his residency at Hospital for Special Surgery in 1993 and went on to do a pediatric orthopaedic fellowship at Texas Scottish Rite in Dallas. He was a talented pediatric orthopaedic surgeon who cared for children in Northern Virginia, Maryland, and the District of Columbia for 24 years. His career connected him with other surgeons and patients around the country and his expertise helped advance the knowledge and treatment of orthopaedic problems in children. He was the Vice Chair for Clinical Affairs of the Children’s National Medical Center Department of Orthopaedics and Sports Medicine and Chief Surgical Officer at Pediatric Specialists of Virginia.

He is remembered by the residents of his class as a truly exceptional colleague and friend. Dr. Hanway never missed an opportunity to support his children, attending each game, track meet, and theatre production with fervent enthusiasm and love. Aside from being a talented and caring doctor, he loved cycling, soccer, and the outdoors. He is survived by his wife, Elizabeth (Libby), and his four children, Sasha, Tori, Christian, and Sophia.
Class Notes

Resident Class of 1977
George C. Brown, MD, retired from his orthopaedic practice in 2015 and lives in Massachusetts. Every summer Dr. Brown and his wife take their boat and sail to Maine. They winter in Florida where they enjoy playing tennis. Lance N. Brigham, MD, resides in Seattle, Washington and currently does independent medical exams after having retired from orthopaedic practice many years ago. Retiring from practice in 2000, Roy M. Rubin, MD, went on to teach health sciences at community college and is now a consultant for the Social Security Administration in Atlanta, Georgia. W. Norman Scott, MD, based in New York City, is an internationally-recognized joint reconstruction surgeon, professor, and implant designer. Dr. Scott has served as team doctor for multiple professional clubs and CEO of Professional Team Physicians. Jon Wang, MD, retired from orthopaedic practice in 2013 and now serves as Consultant for the University of Arizona Athletics. Dr. Wang’s volunteer activities include serving as a reading coach for elementary school kids, a fitness coach for adults, and life-skills coach for military veterans in state prison.

Resident Class of 1980
Gary M. Gartsman, MD, is enjoying life and playing a lot of golf after retiring and moving back to Los Angeles, CA. Richard J. Kearns, MD, is living in Houston, TX and recently cut back work to four days a week. In his spare time, Dr. Kearns plays golf and skis. Bruce Reider, MD, splits his time between focusing on sports medicine at University of Chicago and serving as an assistant professor in the department of orthopaedic surgery. Benjamin McArthur, MD, is a member of Texas Orthopaedics Sports and Rehabilitation Associates in Austin, Texas and an assistant professor of surgery and perioperative care at the University of Texas Dell Medical School. This year he has assumed the role of Educational Experience Director for the University of Texas Health Sciences Center in Houston.

Resident Class of 1998
Robert P. Dunbar, MD, serves on the Board and is the Treasurer of the Foundation for Orthopaedic Trauma. Dr. Dunbar also coaches high school level lacrosse.

Resident Class of 2013
Marschall Berkes, MD, concluded his service in the United States Air Force with an honorable discharge in August 2017, earning over 14 awards and decorations in the process. He then pursued further training, completing an orthopaedic trauma fellowship at the University of Texas Health Sciences Center in Houston. Dr. Berkes will join the orthopaedic trauma team at Washington University in St. Louis, serving as an assistant professor in the department of orthopaedic surgery.

Benjamin McArthur, MD, is a member of Texas Orthopaedics Sports and Rehabilitation Associates in Austin, Texas and an assistant professor of surgery and perioperative care at the University of Texas Dell Medical School. This year he has assumed the role of Educational Experience Director for the University of Texas Health Sciences Center in Houston. Dr. Berkes will join the orthopaedic trauma team at Washington University in St. Louis, serving as an assistant professor in the department of orthopaedic surgery.

Resident Class of 1996
Paul E. Kovatis, MD, the former President and Past Chairman of the Medical Board and Medical Staff of Hackensack-Meridian Healthcare, Hackensack Campus, has been re-elected as a Member-at-Large. He is the only orthopaedist to serve in these positions in over two decades. Dr. Kovatis has been working and treating veterans via the Wounded Warrior Foundation. He is a member of the US Navy Seal Foundation and “Team Never Quit” and “The Lone Survivor Foundation” of the US Navy Seals.

Michael Khair, MD, conducted a BSEL Visiting Alumni session in April.

Bioskills Education Laboratory
Visiting Alumni Program
APRIL 2018
This unique program allows current and former trainees to maintain a partnership of higher learning. External alumni have the opportunity to return to HSS to co-facilitate a specialty lab session and showcase their expertise. Residents and fellows have the opportunity to network with former colleagues and mentors. We would like to thank two alumni who recently conducted sessions for our current trainees:

Distal Femoral Replacement
Wakenda Tyler, MD, (Resident 2007) ARJR Lab

PLC Reconstruction and Lateral Sided Knee Injuries
Michael Khair, MD, (Resident 2014) Sports Lab

If you are interested in conducting a session of this program, contact Colleen O’Shea, MPA at osheac@hss.edu.
Residents
Shevaun M. Doyle, MD, (1997) received the 2018 Wholeness of Life Award on May 23 which is presented by the Healthcare Chaplaincy and HSS to someone for his or her dedication to providing compassionate care to patients, in a way that balances physical, emotional and spiritual wellbeing.

Mary K. Crow, MD, (Fellow 1983), and Jane E. Salmon, MD, (Fellow 1983) have been named honorary members of the European League Against Rheumatism (EULAR) during the Annual European Congress of Rheumatology in Amsterdam. As a mark of distinction, EULAR elects honorary members based on their outstanding service in accomplishing the organization’s objectives and in 2017, began nominating its first overseas individuals. Dr. Crow is among the first two Americans honored in 2017, and Dr. Salmon is the third American recognized.

Michael L. Parks, MD, (1997) was inducted as president of the Orthopaedic Research and Education Foundation (OREF) at the OREF Board of Trustees Meeting in New Orleans in March. Dr. Parks will serve a two-year term in this position. The mission of OREF is to improve lives by supporting excellence in orthopaedic research. As OREF president, Dr. Parks will serve as the principal executive officer and will supervise and control the business and affairs of the Foundation. Prior to his induction as president, Dr. Parks served as co-chair of the OREF James R. Urbaniak, MD, Mentor Campaign, which raised money to fund research in regenerative medicine and cellular therapies.

Duretti Fufa, MD, (Resident 2011) has stepped down from his position as Program Director of the Residency Program, which he has held for the past 15 years. In honor of Dr. Bosstrom’s influence in overseeing the residency program and ensuring it remains the #1 program in the country, the annual chief resident research presentations will now be named the Mathias P.G. Bosstrom, MD, Chief Resident Research Presentations. While Dr. Bosstrom will remain Vice Chair of Education & Academic Affairs, overseeing the Academic Mission of HSS, the role of Resident Program Director will now transition to Dr. Duretti Fufa.

Fellows
Michael L. Parks, MD, (1997) was promoted to Associate Professor at University of Pittsburgh and recently hosted the UPMC International Consensus Meeting on Cartilage Repair of the Ankle. This past year, Dr. Hogan was named Gateway Medical Society Physician of the Year and the Society of Black Academic Surgeons Leadership and Faculty Development Institute Awardee. He was named Best Doctor by Pittsburgh Magazine and one of the Most Influential Black Doctors by Savoy Magazine. Dr. Hogan also received the UPMC Award for Commitment and Excellence in Service (ACES).

Bradford S. Waddell, MD, (2016) was recently named Chair of the Young Arthroplasty Group (YAG) Committee in the American Association of Hip and Knee Surgeons (AAHKS). The goal of the YAG is to connect arthroplasty surgeons within their first 5 years of practice, along with arthroplasty fellows, in order to promote collaboration and young surgeon activity within AAHKS, with a particular focus on research, leadership and advocacy.

Medical Staff
David L. Helfet, MD, was recently named the recipient of the Society of Honorary Police Surgeons of the City of New York Inaugural Award. This award recognizes the continued efforts, skill, and support of Dr. Helfet to the members of the New York Police Department (NYPD) and their families. Members of the NYPD, New York Fire Department (NYFD) and New York State Police (NYSP) have always been a major priority to Dr. Helfet, as he appreciates the difficult and challenging work they do each and every day. As Honorary Surgeon for the NYPD and Assistant Division Physician for the NYSP since 1999, as well as Honorary Medical Officer and Honorary Fire Officer since 2009, Dr. Helfet has had the opportunity to provide treatment to many members of all three organizations throughout his career.

Daphne Scott, MD, was recognized at the Harlem Fine Arts Show (HFAS) which aims to raise awareness about medicine as a career choice for young people and to promote health and wellness by embracing the medical community and showing the parallel between art and health. Dr. Scott specializes in the nonsurgical treatment of acute, overuse and chronic injuries in patients of all ages.

Mathias P.G. Bosstrom, MD, (Resident 1995, Fellow 1996) has stepped down from his position as Program Director of the Residency Program, which he has held for the past 15 years. In honor of Dr. Bosstrom’s influence in overseeing the residency program and ensuring it remains the #1 program in the country, the annual chief resident research presentations will now be named the Mathias P.G. Bosstrom, MD, Chief Resident Research Presentations. While Dr. Bosstrom will remain Vice Chair of Education & Academic Affairs, overseeing the Academic Mission of HSS, the role of Resident Program Director will now transition to Dr. Duretti Fufa.

Macalus V. Hogan, MD, (2013) was named the recipient of the Society of Honorary Police Surgeons of the City of New York Inaugural Award. This award recognizes the continued efforts, skill, and support of Dr. Helfet to the members of the New York Police Department (NYPD) and their families. Members of the NYPD, New York Fire Department (NYFD) and New York State Police (NYSP) have always been a major priority to Dr. Helfet, as he appreciates the difficult and challenging work they do each and every day. As Honorary Surgeon for the NYPD and Assistant Division Physician for the NYSP since 1999, as well as Honorary Medical Officer and Honorary Fire Officer since 2009, Dr. Helfet has had the opportunity to provide treatment to many members of all three organizations throughout his career.

Daphne Scott, MD, was recognized at the Harlem Fine Arts Show (HFAS) which aims to raise awareness about medicine as a career choice for young people and to promote health and wellness by embracing the medical community and showing the parallel between art and health. Dr. Scott specializes in the nonsurgical treatment of acute, overuse and chronic injuries in patients of all ages.

Mathias P.G. Bosstrom, MD, (Resident 1995, Fellow 1996) has stepped down from his position as Program Director of the Residency Program, which he has held for the past 15 years. In honor of Dr. Bosstrom’s influence in overseeing the residency program and ensuring it remains the #1 program in the country, the annual chief resident research presentations will now be named the Mathias P.G. Bosstrom, MD, Chief Resident Research Presentations. While Dr. Bosstrom will remain Vice Chair of Education & Academic Affairs, overseeing the Academic Mission of HSS, the role of Resident Program Director will now transition to Dr. Duretti Fufa.

Duretti Fufa, MD, (Resident 2011) has been integral in guiding the HSS graduate medical education program in several roles, most recently as Chair of the Medical Student Advisory Committee and Chair of the Resident Selection Committee. She has also been an active member of the Resident Leadership Group, Curriculum Committee, Competency Committee and most recently Assistant Residency Program Director. She will be joined by Daniel Green, MD, MS, FAAP, FACS, (Resident 2006) who will assume the role of Associate Residency Program Director.
Elizabeth B. Gausden, MD, grew up in a suburb of Milwaukee, Wisconsin and attended the University of Wisconsin, where she majored in molecular biology and Spanish and was a member of the varsity softball team. Dr. Gausden attended medical school at Weill Cornell Medical College and completed her residency training in orthopaedic surgery at HSS, where she was awarded the Jean McDaniel Award for Teaching and Leadership. This year, Dr. Gausden will be a fellow in orthopaedic trauma at University of Texas-Houston. Next year, she plans to complete an arthroplasty fellowship at the Mayo Clinic. Outside of work, she enjoys spending time with her husband, Andrew.

Lauren Roberts, MD, MSc, FRCSC, completed her Foot and Ankle fellowship at HSS in 2018 and will begin her foot and ankle practice in Burnaby, British Columbia, Canada in the Department of Orthopaedics for the University of British Columbia. Originally from Waterloo, Ontario, Canada, she completed her undergraduate degree with honors in kinesiology as a Dean’s List Scholar at Acadia University in Wolfville, Nova Scotia, Canada. Following this, Dr. Roberts completed a master’s degree at the University of Ottawa in Ottawa, Ontario in human kinetics. She then received her medical degree from the Michael G. DeGroote School of Medicine at McMaster University in Hamilton, Ontario. Dr. Roberts’ orthopaedic surgical training was completed at the University of British Columbia in Vancouver, BC. During this time, she was also a co-chair for the Canadian National Orthopaedic Resident Association. She looks forward to returning to her alma mater not only for the west coast mountain views but also to give back to the UBC residency training program as both a teacher and mentor. Dr. Roberts looks forward to building a truly comprehensive foot and ankle practice based in large part on her breadth of experience here at HSS.

Dean Wang, MD, is an assistant professor and chief of the sports medicine division in the Department of Orthopaedic Surgery at UC Irvine Medical Center in Orange County, California. Dr. Wang obtained his undergraduate degree in biomedical engineering from Duke University. He received his medical degree from the Cleveland Clinic Lerner College of Medicine of Case Western Reserve University, where he was a Howard Hughes Medical Institute-NIH Research Scholar. He completed his residency in orthopaedic surgery at UCLA Medical Center and subsequently completed a two-year fellowship in sports medicine at HSS. He has clinical and research interests in novel procedures for articular cartilage restoration, biologic augmentation of cartilage, tendon, and ligament healing, and joint biomechanics. In his spare time, he enjoys playing and watching sports, reading, traveling, and the outdoors. Dr. Wang was born and raised in Baltimore, Maryland and currently resides in Newport Beach, California.

Sean Sutphen, DO
Adult Reconstruction and Joint Replacement
sean.sutphen@gmail.com

Sean Sutphen, DO, finished an Adult Reconstruction and Joint Replacement Fellowship at HSS and joined the Illinois Bone and Joint Institute in Chicago, Illinois. Dr. Sutphen specializes in adult hip and knee reconstruction and replacement surgery. He received his undergraduate degree from Miami University, and earned his medical degree at Lake Erie College of Medicine. Dr. Sutphen went on to an orthopaedic surgery residency at Ohio University and then completed his training at HSS. He is very grateful for the superb training that he received at HSS. Dr. Sutphen is a member of the American Academy of Orthopaedic Surgeons and American Association of Hip and Knee Surgeons. He currently lives in Winnetka, Illinois and enjoys many other activities outside of orthopaedic surgery, including spending time with his wonderful wife and two daughters, hockey, fishing, and water sports.

Brent Gerlach, MD
Anesthesiology
brent.gerlach15@gmail.com

Brent Gerlach, MD, graduated from Western Michigan University with a double major in biomedical sciences and Spanish. He played Division 1 baseball there for five years and was a two-time captain. Dr. Gerlach attended Wayne State University School of Medicine and graduated AOA. He completed his anesthesia residency at Northwestern Memorial Hospital in Chicago where he served as chief resident. Dr. Gerlach was one of the chief fellows this year at HSS and has joined Valley Anesthesia Consultants in Phoenix/Scottsdale, Arizona.

Complex Limb Deformity Reconstruction About the Foot & Ankle
Douglas Beaman, MD
Professor of Physical Medicine and Section Head, Orthopaedic Surgery
Department of Surgery
Legacy Emanuel Hospital
Portland, OR
This past academic year I was fortunate to receive the HSS Professional Leadership Education Scholarship Award, which supported my attendance at a course of my choice leading up to my year as chief resident. I chose to attend the ACGME Chief Resident Leadership Conference held in La Jolla, CA, June 21-23, 2018.

Attendees included 53 chief residents throughout all fields of medicine. Each of the three days focused on a different theme, with the overall goal of providing the tools, skills, and learning environment to enhance understanding of interpersonal communication and group dynamics, including skills critical to success and satisfaction as both a clinician and leader.

The theme of the first day was self-awareness as a foundation for understanding others and overall group awareness. Prior to the course we took a Myers-Briggs Type Indicator questionnaire to determine how we perceive the world and make decisions. During the course this data was used not only as an introspective tool to better understand where we fall on each of the four spectra, but also as a way to understand that others may fall on different parts of each of the spectra and may require different styles of feedback and constraints to allow them to function in an optimal manner.

The second day shifted to the theme of group awareness. We reviewed the typical stages that all new groups progress through when forming and the different styles, with their associated pros and cons, for resolving conflicts that inevitably arise. We also took a separate instrument that determined our preferred type of conflict resolution: I learned that compromising is my favored technique. The day finished by focusing on techniques of providing feedback, specifically negative feedback when a colleague is struggling.

Finally, the third day of the course focused on the topic of wellness. We learned strategies for avoiding burnout during residency. Speaking and brainstorming with the other residents reemphasized to me not only how fortunate we are here at HSS, but also how far ahead we are as far as support, cost-reduction strategies, funding, amenities, and social opportunities as compared to nearly every other residency program. When we created a rubric for the ideal wellness strategy, our home program checked every box. I am extremely grateful to have had the opportunity to attend this course and look forward to putting what I learned into action in the upcoming academic year.

Oheneba Boachie-Adjei, MD

He reminds current HSS residents to “recognize that they are at the top of the group that apply for orthopaedics, and they are in the best place for orthopaedics—at the top of the top. They need to recognize that opportunity and learn as much as they can. It will require hard work, commitment and diligence.” He also advises them to seek out and learn from experienced surgeons, and to become active in specialty societies.

Also, he says, “they shouldn’t forget that at the end of the day, you have to go home to your family. And that time must be well spent, and satisfying, to create a balanced work and family life.”

“I’ve been very lucky to have my wife and three boys, who grew up at HSS, at ‘310’” he adds. “HSS is in our blood.”

Dr. Boachie’s eldest son, Kwadwo, served as research coordinator in physiatry at HSS, and now works with Emeritus Physiatry Chief Gregory Lutz, MD, at Regenerative SportsCare Institute. His middle son, Yaw, is a hand, shoulder and elbow surgeon based in Atlanta, Georgia. His youngest son, Kwame, has also stayed close to orthopaedics, as a surgical technologist in the operating theater at HSS.
Graduation Award Recipients

Residents

Lewis Clark Wagner, MD, Award for Excellence in Orthopaedic Clinical/Translational Research
Benedict U. Nwachukwu, MD, MBA
Russell F. Warren, MD, Award for Excellence in Orthopaedic Basic/Translational Research
Lionel E. Lazaro, MD
Philip D. Wilson, Jr., MD, Teaching Award
Russell F. Warren, MD
Richard S. Laskin, MD, Young Attending Award
Peter K. Sculco, MD
Nancy Bischoff Mentor Award
Mathias P.G. Bostrom, MD
Jean C. McDaniels Award
Elizabeth B. Gausden, MD, MPH
Thomas P. Sculco, MD, Award
Shawn S. Richardson, MD
Samuel Delgado, CST, Award
Justin Dufresne, CST
Academic Achievement Award
Elizabeth B. Gausden, MD, MPH

Fellows

**Upcoming Professional Education Programs**

HSS offers CME programs throughout the year. All onsite courses below will be held at HSS in New York City unless otherwise noted. Register online at hss.edu/cme. Questions? Email professionaleducation@hss.edu or call 212.606.1057.

**COMPLIMENTARY CME/CEU WEBINARS**

**SEPTEMBER 25, 2018** 7:00–8:30 pm
Simple Solutions to Complex Problems Webinar Series
Complex Primary Total Knee Arthroplasty

**OCTOBER 3, 2018** 6:00–7:15 pm
Evaluation of the Athlete with Low Back Pain Webinar Series
Performance Training, Nutritional Support, and Return-to-Play

**ONSITE & LIVE STREAMING COURSES**

**OCTOBER 25–27, 2018**
100th Annual Alumni Meeting
Target audience: Physicians and scientists working in the specialties of orthopaedics, rheumatology, radiology, anesthesiology, physiatry and neurology, including HSS alumni and current residents, fellows and medical staff.

**NOVEMBER 9–10, 2018**
Musculoskeletal Ultrasound Course: A Hands-on, Interactive Experience
Target audience: Radiologists, sports medicine physicians and surgeons, and physiatrists. Physician assistants, nurse practitioners, sonographers, residents, fellows, and medical students may also benefit from attending this activity.

**NOVEMBER 29–DECEMBER 1, 2018**
2018 Annual Holiday Knee & Hip Course
New this year: Invite your team to the Allied Health Professional Specialty Track!
Target audience: Orthopaedic surgeons, physician assistants, physical therapists, registered nurses, and nurse practitioners. Residents, fellows, and medical students may also benefit from attending this activity.
Location: The Grand Hyatt
109 East 42nd Street, New York, NY

**FEBRUARY 2, 2019**
Bobby Menges Memorial HSS Limb Deformity Course
Target audience: Foot and ankle surgeons, pediatric orthopaedic surgeons, orthopaedic trauma surgeons, spine surgeons, physician assistants, nurse practitioners, and surgical technicians. Residents, fellows, and medical students can also benefit from attending this activity.

Don’t forget about this benefit for dues-paying alumni!

**TAKE 50% OFF** the registration fee for upcoming Professional Education Programs.

Hospital for Special Surgery holds Accreditation with Commendation, the highest level of recognition offered by the Accreditation Council for Continuing Medical Education (ACCME).
