CLINICAL APPROACH TO THE EVALUATION AND TREATMENT OF Congenital Muscular Torticollis

NOVEMBER 11–12, 2016

Hospital for Special Surgery | New York City

ACCREDITATION This activity has been approved for 6.5 onsite and 6.5 online Physical Therapy Contact Hours for Day 1 and 11.0 onsite Physical Therapy Contact Hours for Days 1 and 2.

Provided by HOSPITAL FOR SPECIAL SURGERY Office of Continuing Medical Education and Department of Rehabilitation

LIVE STREAMING available for Day 1

Join us both days onsite!
LOCATION
Hospital for Special Surgery
Richard L. Menschel Education Center, 2nd Floor
535 East 70th Street, New York, NY 10021

LIVE STREAMING also available for Day 1

STATEMENT OF NEED
This comprehensive program will be presented by a dynamic, experienced interdisciplinary team of therapists, physicians, and an orthotist. Etiology, incidence and differential diagnosis with a special focus on assessment and therapeutic interventions based on recent research and American Physical Therapy Association clinical practice guidelines will be presented in detail. Guidelines for examination and progression of treatment including both traditional and adjunct treatment approaches, as well as discharge will be discussed. Surgical intervention for children with severe cases of torticollis and post-surgical treatment guidelines will be presented. Day 2 will include a hands on laboratory component focusing on therapeutic handling for infants of various ages as well as a live demonstration of assessment and treatment.

TARGET AUDIENCE
This activity is targeted to physical therapists, physical therapist assistants, occupational therapists and certified occupational therapist assistants.

ACCREDITATION AND CREDIT DESIGNATION
Physical Therapists and Physical Therapist Assistants: Hospital for Special Surgery is a New York State Education Department approved provider for physical therapy continuing education. Hospital for Special Surgery designates this activity for a maximum of 6.5 Contact Hours onsite and 6.5 online for Day 1. Hospital for Special Surgery designates this activity for a maximum of 11 Contact Hours onsite for Days 1 and 2. The following states require continuing education units with no state-specific approval: CT, IA, MA, and WA. This activity is pending approval in Florida and New Jersey. This activity is pending approval for CCUs by the Federation of State Boards of Physical Therapy (FSBPT) and therefore would be accepted by the physical therapy regulatory boards/agencies in certain U.S. jurisdictions. The CCU amount will be determined by the FSBPT. The physical therapy boards in the following states currently accept the FSBPT certification: AK, AR, AZ, CA, DE, District of Columbia, GA, HI, ID, IL, IN, KS, KY, MI, MO, MS, MT, NC, ND, NE, OR, SC, TN, UT, VA, VT, WI, and WY.

Occupational Therapists and Certified Occupational Therapist Assistants: Hospital for Special Surgery is a New York State Education Department approved provider for occupational therapy continuing education. Hospital for Special Surgery designates this activity for a maximum of 6.5 Contact Hours onsite and 6.5 online for Day 1. Hospital for Special Surgery designates this activity for a maximum of 11 Contact Hours onsite for Days 1 and 2. This course is considered appropriate for clinicians looking to enhance their skills in the treatment and care of the infant with congenital muscular torticollis. In order to receive physical and occupational therapy credits, a post-course knowledge assessment is required. There is no passing grade requirement.

SPECIAL NEEDS
Hospital for Special Surgery is accessible for individuals with disabilities or special needs. Participants with special needs are requested to contact the Office of Continuing Medical Education at 212.606.1812.

FINANCIAL DISCLOSURE
In accordance with the Accreditation Council for Continuing Medical Education’s Standards for Commercial Support, all CME providers are required to disclose to the activity audience the relevant financial relationships of activity directors, planning committee members, presenters, authors and staff involved in the development of CME content. An individual has a relevant financial relationship if he or she has a financial relationship in any amount occurring in the last 12 months with a commercial interest whose products or services are discussed in the CME activity content over which the individual has control.

It is the policy of Hospital for Special Surgery to request all financial relationships that activity directors, planning committee members, presenters, authors and staff have with commercial interests, but to disclose to the activity audience only the relevant financial relationships.

FOR MORE INFORMATION
Go to www.hss.edu/cme for a complete calendar of scheduled live and online CME activities.

LEARNING OBJECTIVES
HSS continuing medical education activities are intended to improve the quality of patient care and safety.

Upon completion of Day 1, participants will:

- Define congenital muscular torticollis.
- Describe three accepted theories on the etiology of congenital muscular torticollis.
- List three related clinical findings associated with congenital muscular torticollis.
- Explain the incidence and prognosis of congenital muscular torticollis.
- Recall at least two variations in an infant’s development as affected by congenital muscular torticollis.
- List the steps of at least one evidence-based examination test and measure used for assessment of the infant with congenital muscular torticollis and be able to perform the steps of this test or measure.
- Identify relevant red flags for differential diagnosis during an examination of an infant with congenital muscular torticollis.
- Recall at least two evidence-based principles of treatment progression and discharge criteria and apply these principles in practice as appropriate.
- List the four action statements from the evidence based guidelines for physical therapy management of congenital muscular torticollis.
- Identify two indications for surgery and one for bracing.

Upon completion of Day 2, participants will:

- Identify at least one handling technique appropriate for an infant with congenital muscular torticollis at 0–6, 6–9 and 9–12 months of age.
- Describe the steps in TOT collar fitting and implement the technique in practice.
- Design and be able to justify a treatment plan for an infant with congenital muscular torticollis.
