

HSS ASC of Manhattan

Amounts Generally Billed (“AGB”)

HSS ASC of Manhattan utilizes the “look-back” method to calculate the Amount Generally Billed (“AGB”). Specific percentages are calculated by applying the average Medicaid collection ratio to the amount charged. It is calculated annually by dividing 12 months of allowed Medicaid claims by the gross charges associated with those claims. The specific AGB percentages are as follows:

Provider Type	Category	% of Charges
HSS ASC - Facility	Ambulatory Surgery	11% of Facility Charges
Applicable Schedule A Physicians	All	6% of Physician Charges
