HSS West Side ASC
Amounts Generally Billed ("AGB")

HSS West Side ASC utilizes the "look-back" method to calculate the Amount Generally Billed ("AGB"). Specific percentages are calculated by applying the average Medicaid collection ratio to the amount charged. It is calculated annually by dividing 12 months of allowed Medicaid claims by the gross charges associated with those claims. The specific AGB percentages are as follows:

Provider Type	Category	% of Charges
HSS West Side ASC - Facility	Ambulatory surgery	7%
Applicable Schedule A Providers	All	5%
